WMSDB - Worldwide Mollusc Species Data Base

Checklist of Phylum MOLLUSCA

revised 31-Aug-2017

Author: Claudio Galli - claudio@bagniliggia.it

the following checklist includes all taxa stored inside the WMSDB Data Base
http://www.bagniliggia.it/WMSD/WMSDhome.htm

Fossil only taxa are also included

DB counters:

Family=1939, Genus=19177, Subgenus=3122, Species=141392, Variety=83763

DB also includes synonym/omonym:
346 for Family, 9090 for Genus/Subgenus and 72375 for Species/Variety

giving a total of 331204 taxa.

many synonyms are omitted because the search engine of WMSDB is in any case able to retrieve a species inside a Family if the name of the species and the Author are specified, regardless to the Genus

many downloads are available at:
